

STICKER SEAL

BARRIER

TAMPER-EVIDENT STICKER SEAL

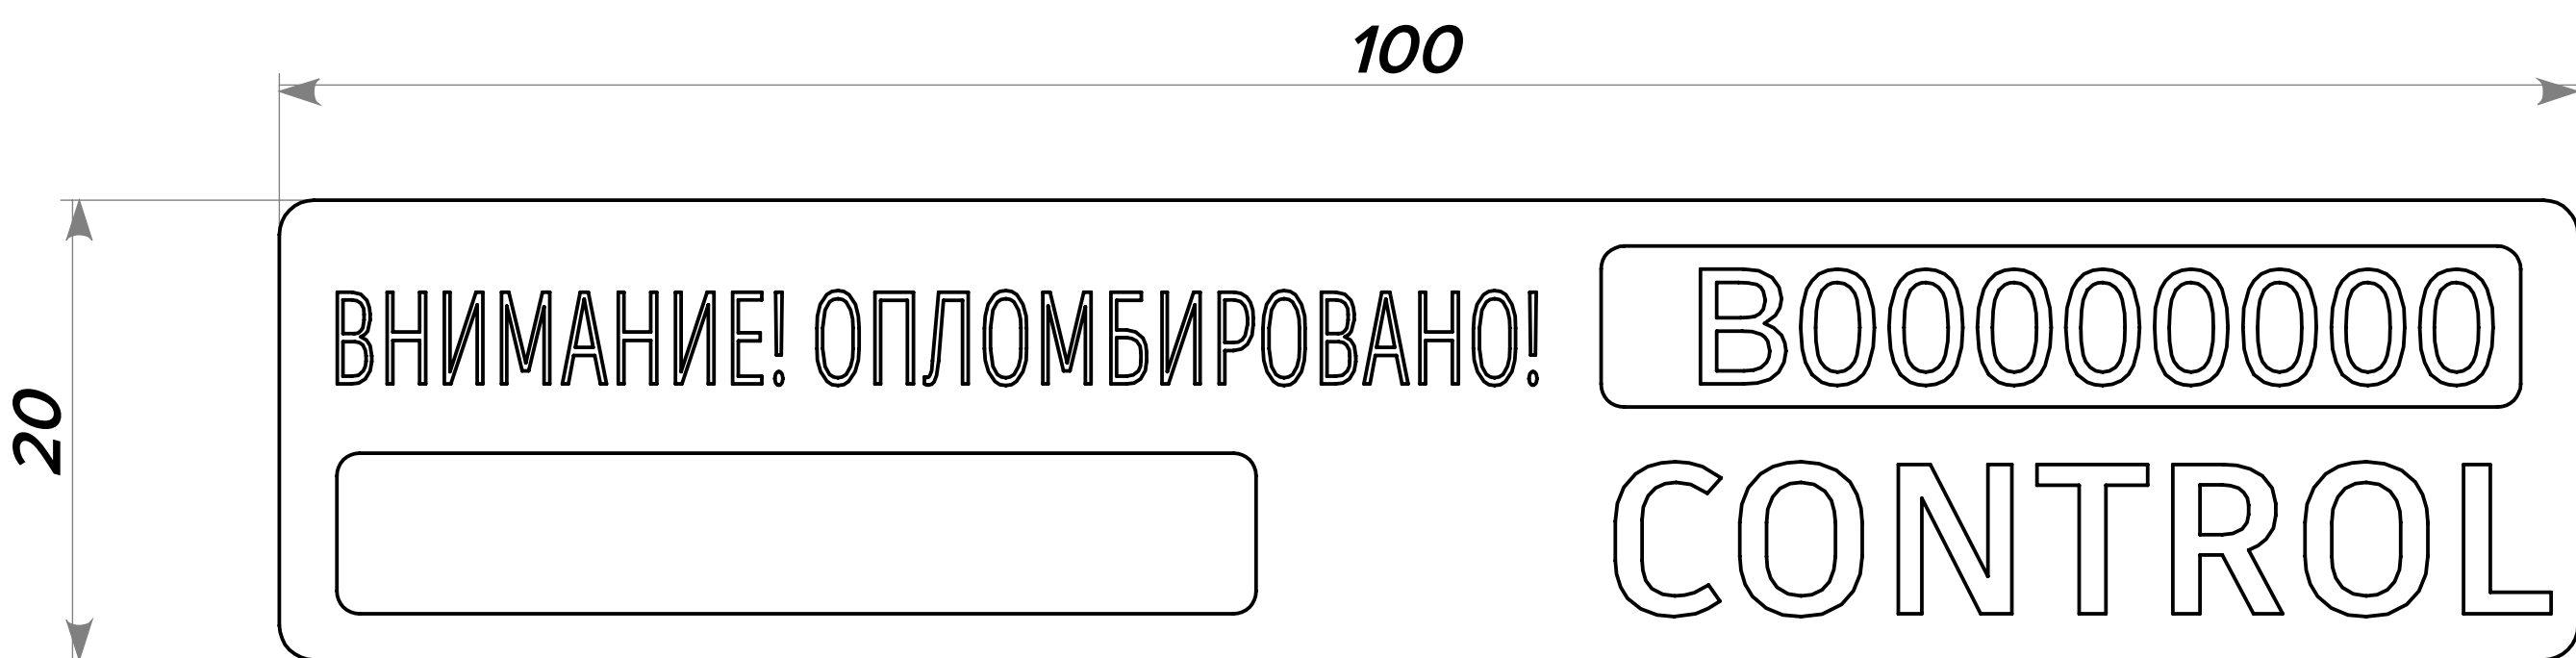

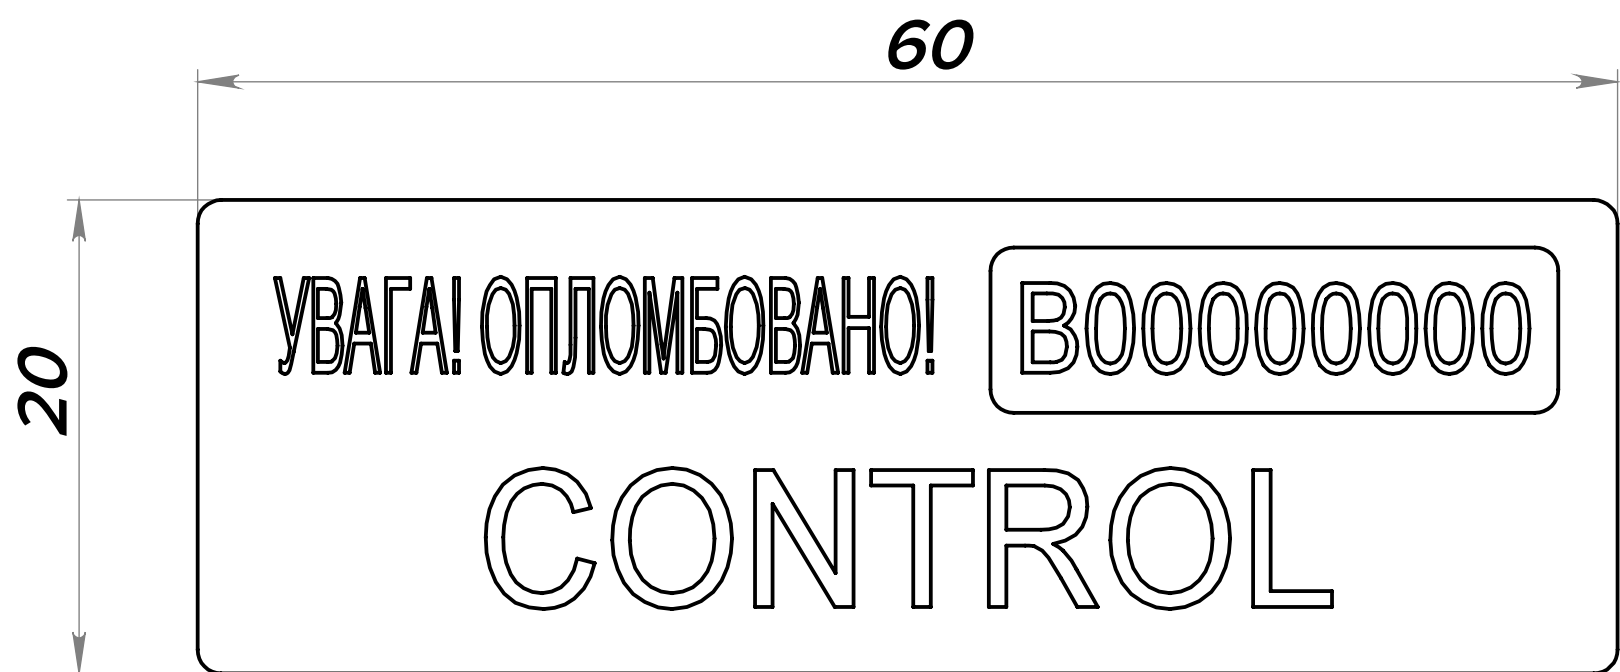

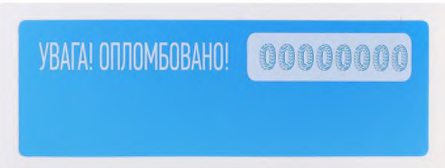

Description:

- Made of polyester
- Installation temperature range: +5/+50°C
- Operation temperature range: -50/+60°C
- Dimensional specifications: 60 x 20; 100 x 20 mm
- The hidden "STOP" inscription appears when the seal is being removed, however, it does not disappear when the seal is reattached
- Sequential, non-repeating numbering of 8 digits is used

The Barrier sticker seal can be manufactured in two versions:

- The product that leaves the mark. The hidden inscription and the adhesive base of the seal remain on the sealed surface and require further cleaning after the seal removal.
- The product leaves no mark. The hidden inscription and the adhesive base of the seal do not remain on the sealed surface and further cleaning after removal of the seal is not required.
